Looking to the future

PitRex

1. Company Profile

PitRex is a leading quantitative encryption company headquartered in Washington, USA. It was established in 2016 with a registered capital of US\$50 million. We focus on the field of digital assets and provide customers with excellent quantitative trading, digital asset management and cryptocurrency consulting services. Through advanced technical architecture and rich industry experience, we are committed to creating stable and high-return investment opportunities for users, while strictly abiding by regulatory standards to ensure the security of customers' assets and data. Our company has achieved significant growth and success in the digital asset space and continues to strive to innovate to meet evolving market needs.

2. DEVELOPMENT MILESTONES

PitRex

2016

The PitRex project was established and began researching and developing quantitative cryptocurrency trading strategies.

1

2017

The first quantitative trading algorithm was successfully developed and tested and began to operate on the cryptocurrency market.

2

2018

Established the first batch of user relationships and quickly accumulated a user base.

3

2019

Introduce digital asset management services and start managing clients' investment portfolios.

4

2020

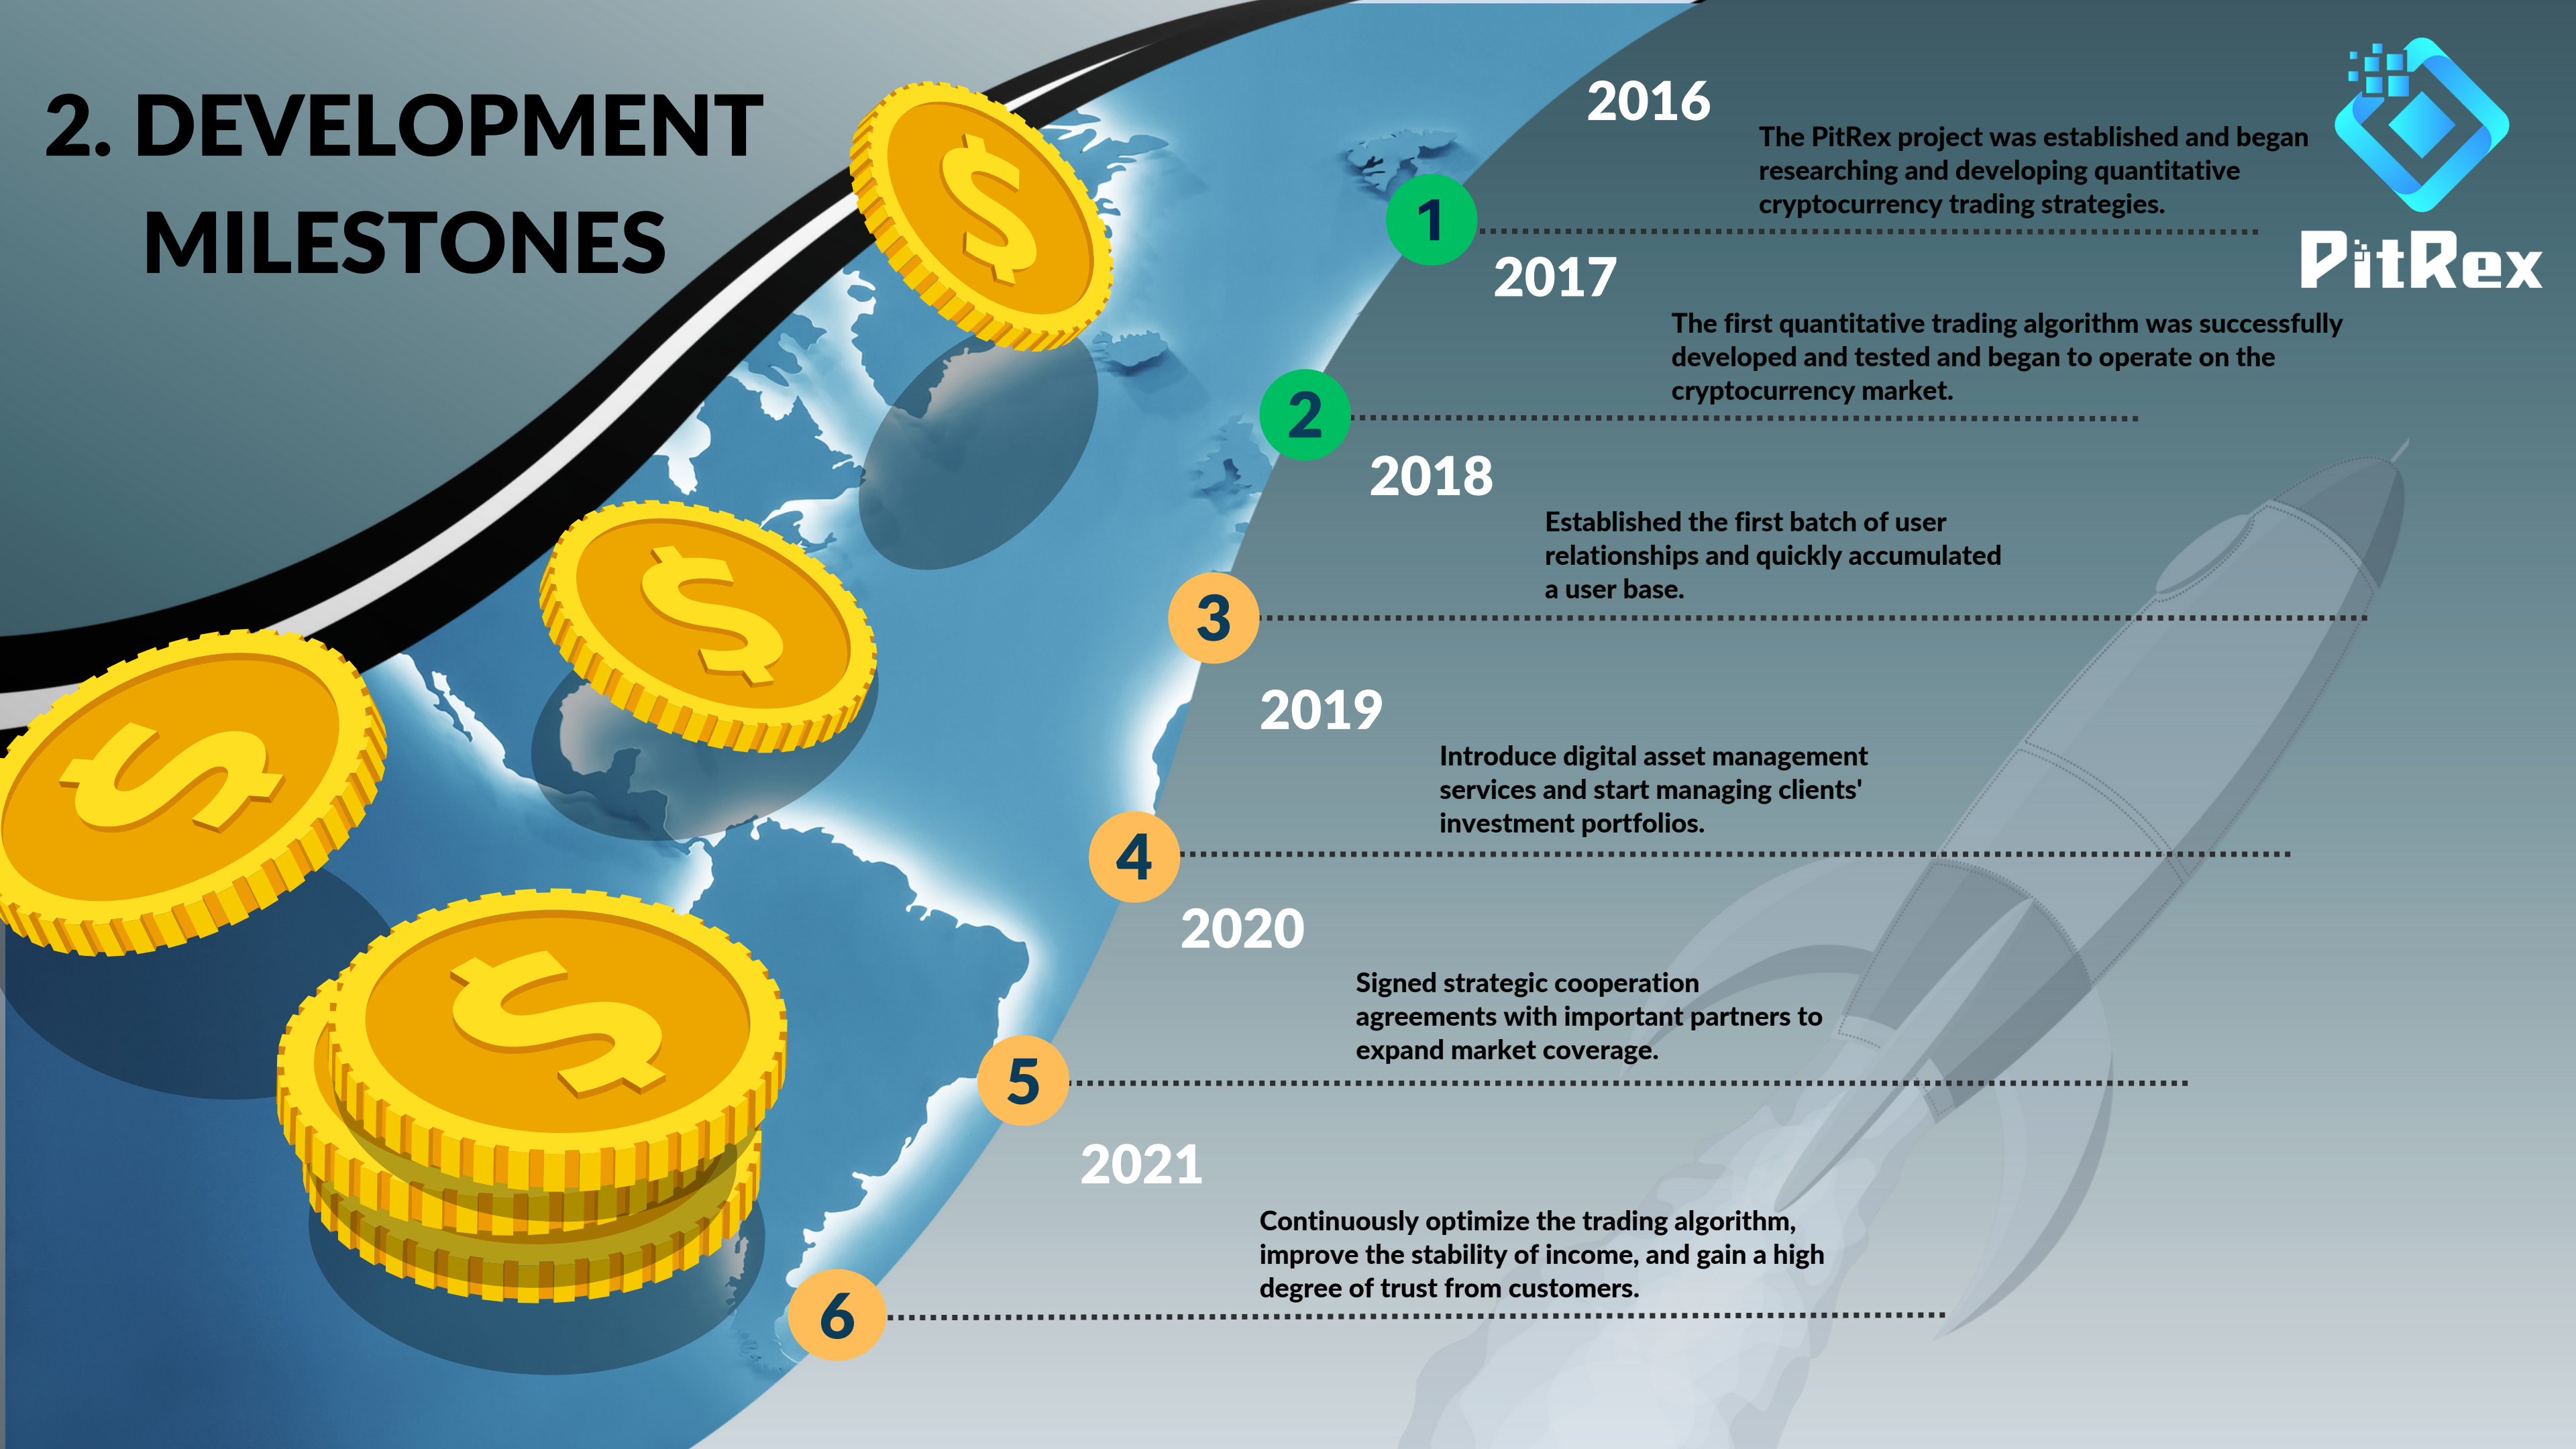

Signed strategic cooperation agreements with important partners to expand market coverage.

5

2021

Continuously optimize the trading algorithm, improve the stability of income, and gain a high degree of trust from customers.

6

2022

Launched ICO to raise funds and successfully raised funds for team expansion and technology upgrades.

2023

Further expand the global market and enter new digital asset fields.

**2024
(OUTLOOK)**

Continue to innovate, launch new products and services, expand global influence, and become a leader in the field of digital assets.

3. Investment and application

Investment Strategy

PitRex uses advanced quantitative trading strategies to maximize users' investment returns. Our investment strategies include but are not limited to the following:

- 1. Market Analysis:** We conduct in-depth market analysis, including technical analysis and fundamental analysis, to identify potential trading opportunities. We utilize advanced data analysis tools to monitor market dynamics
- 2. Quantitative models:** We develop sophisticated quantitative models for identifying price trends, volatility and trading opportunities. These models are calculated based on historical data and real-time market information.
- 3. Risk management:** We implement strict risk management strategies, including stop loss and position management, to reduce potential losses. Our goal is to protect users' investment funds.
- 4. Diversified asset portfolio:** We invest in a variety of digital assets to spread risks. This includes Bitcoin, Ethereum, and other major cryptocurrencies.

Application of digital assets

PitRex's digital asset management services offer a variety of applications and benefits, including:

- 1. Long-term investment:** We help users build long-term digital asset investment portfolios to achieve capital appreciation. Our investment strategies are designed to capture long-term trends and deliver sustainable returns.
- 2. Short-term trading:** For users seeking short-term gains, we provide high-frequency trading and short-term investment strategies to take advantage of market fluctuations.
- 3. Risk adjustment:** We adjust investment strategies based on users' risk preferences and investment goals. Our digital asset management tools help users manage risk and achieve the optimal risk-reward balance.
- 4. Education and support:** In addition to investment services, we also provide education and support about the digital asset market. Our users can access market analysis, news and educational resources through our platform to better understand the digital asset space.

4. INNOVATION AND ADVANTAGES

INNOVATIVENESS

THE PITREX PROJECT IS INNOVATIVE IN MANY ASPECTS IN THE FIELD OF DIGITAL ASSETS, INCLUDING BUT NOT LIMITED TO:

Quantitative trading strategies

We employ highly sophisticated quantitative trading strategies based on advanced algorithms and data analysis to capture market opportunities. This strategy allows us to respond quickly to rapidly changing market conditions and provide stable investment returns.

Digital asset management tools

We have developed a suite of advanced digital asset management tools to help users optimize their investment portfolios. These tools not only provide real-time data and analysis, but also provide personalized asset allocation based on the user's risk appetite and investment goals.

education and support

We value user education and provide resources and support about the digital asset market. This helps users better understand digital asset investments, enabling them to make informed decisions.

COMPETITIVE ADVANTAGE

THE COMPETITIVE ADVANTAGES OF THE PITREX PROJECT INCLUDE:

Technical strength

Our team is composed of experienced professionals with deep technical knowledge and quantitative trading experience. This allows us to develop highly advanced trading algorithms and digital asset management tools.

Risk Management

We implement strict risk management strategies to protect users' investments. Our stop loss and position management strategies help reduce potential losses.

education and support

We invest in a variety of digital assets to spread risk. This helps users obtain more stable investment returns under different market conditions.

education and support

We put user care first and provide excellent user service and support. We actively listen to our users' needs and continuously improve our services based on their feedback.

5. Market opportunities

The rapid growth of the digital asset market provides huge opportunities for the PitRex project. With the widespread acceptance and application of digital assets around the world, we have discovered the following market opportunities:

Wide application of digital assets

Digital assets are not only widely used as investment tools, but are also used in many industries such as finance, technology, and supply chain. This provides PitRex with potential collaboration and business opportunities in multiple areas.

Growing user base

The digital asset market has attracted more and more investors and users, including individual investors, institutions and enterprises. This growing user base provides us with more potential customers, allowing us to expand our market share.

Wide application of blockchain technology

The wide application of blockchain technology in finance, Internet of Things, supply chain management and other fields provides a foundation for the further popularization and use of digital assets. We can take advantage of the development of blockchain technology to expand the scope of our services.

Global market opportunities

The digital asset market is global and has no geographical boundaries. We can expand markets globally and establish strategic partnerships with international market partners to meet the needs of different regions.

These market opportunities enable the PitRex project to grow rapidly in the digital asset field and provide users with more investment options and services. We will make full use of these opportunities and continue to innovate and develop to achieve long-term project success and sustainable growth.

6. Risk management

In the world of digital assets, risk management is crucial. The PitRex project is committed to implementing strict risk management strategies to protect users' investments. Our risk management measures include but are not limited to the following:

01

Market risk management

We closely monitor market dynamics and utilize advanced data analysis tools to identify potential market risks. Our quantitative trading strategies are designed to capture market opportunities while reducing possible losses caused by market volatility.

02

Asset diversification

We invest in a variety of digital assets, including Bitcoin, Ethereum, and other major cryptocurrencies. This helps spread risk and reduce potential losses if a particular asset performs poorly.

03

Position management

We implement strict position management strategies to ensure that users' investment portfolios are reasonably allocated among different assets to reduce potential losses that may be caused by a single position.

04

Stop loss strategy

We set stop losses to limit potential losses. When the market trend is unfavorable, we will take measures to reduce risks and protect users' investment funds.

05

Compliance and compliance

We strictly adhere to local and international regulations, including KYC (Know Your Customer) and AML (Anti-Money Laundering) policies. We ensure that users' identities are verified and all compliance requirements are adhered to.

We regard risk management as one of the key elements for the success of our projects, and we are committed to providing a safe and reliable investment environment to ensure that users' assets are fully protected. We will continue to improve and optimize our risk management strategies to adapt to the changing market environment while providing users with a better investment experience.

7. User experience

PitRex

User experience is crucial to PitRex. We are committed to ensuring that every user has unparalleled comfort and convenience when using our services.

Our platform is easy to use and provides real-time data and analysis to assist users in making informed investment decisions. Our user support team is always available to answer questions and provide personalized advice. We believe that by providing an excellent user experience, we can build long-term relationships and help users achieve success in the digital asset field.

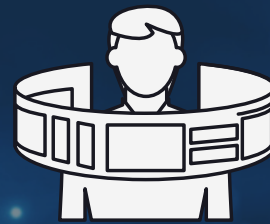

8. Customized service strategy

A customized service strategy is at the core of PitRex, and we are committed to meeting the unique needs of each user to ensure that their investment goals are optimally achieved. Here are the details of our customized service strategy:

PROFESSIONAL CONSULTATION

We have extensive industry experience in our team and can provide users with professional advice on the digital asset market. We maintain close contact with our users to ensure they are aware of market dynamics and potential investment opportunities.

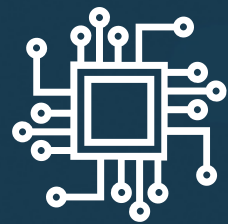

REVIEW REGULARLY

We review regularly with our users to assess whether their investment objectives have changed and whether our investment strategies need to be adjusted. This ensures that our services are always aligned with our users' needs.

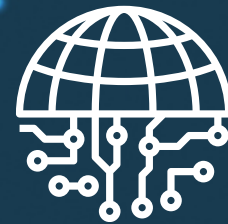

FLEXIBILITY

Our customized service strategy is flexible and can be adjusted according to user needs and changing market conditions. Our goal is to provide users with the best investment solutions in any market environment.

PERSONALIZED INVESTMENT PLAN

We gain a deep understanding of each user's investment objectives, risk appetite and timeline. Based on this information, we work together to develop a personalized investment package designed to meet their needs and goals.

PROACTIVE RISK MANAGEMENT

Our team of professionals works with users to not only create portfolios based on their risk appetite, but also proactively adjust strategies during market fluctuations to mitigate potential risk of loss.

REAL-TIME MONITORING AND REPORTING

Our platform provides real-time data and analytics so users can monitor their portfolio performance at any time. We also regularly provide detailed reports to help users understand their investment status and make decisions.

9. GLOBALIZATION STRATEGY

Our globalization strategy aims to expand PitRex's influence to a global scale. We plan to establish close ties with partners in the international market to meet the needs of users in different regions. By providing multi-language support, compliance adaptation and the development of regional market strategies, we are committed to establishing a strong presence around the world and providing users with global digital asset investment services. We believe that this strategy will help consolidate our international market share and ensure that our users can enjoy high-quality services and support in different countries and regions.

10. LOOKING TO THE FUTURE

PitRex

Looking to the future, PitRex is firmly committed to continuous innovation and development in the digital asset field. We will continue to work on optimizing our platform and services to meet the growing needs of our users. We plan to continuously refine our technology, expand our globalization strategy, and continue to build strong partnerships to ensure we maintain a competitive advantage in an ever-changing market. We firmly believe that the digital asset space is still full of opportunities, and we will actively pursue these opportunities to help users achieve long-term success and continued growth in investment returns. Our vision is to become a leader in the field of digital assets, provide users with excellent investment solutions, and play an important role in the future digital economy.

PitRex

Thank You!
